

# Tour at 'Zemach' Research Farm

## A tour on the farm, in an open area:

- Growing the banana plant in Israel and its unique characteristics;
- The history of the banana, its origin and distribution worldwide;
- Presenting the various studies conducted on the farm and the correlation between them and the increase in yield;
- Various technologies that reveal the needs of the plant;
- Food security, brokerage gaps and more.

To adjust a tour to your needs  
and to schedule a time  
please contact us:

## Professional Lecture:

- Regional Agricultural Corporation, Growers Association, Regional R&D;
- Laboratory services for the farmer;
- Tissue Culture;
- Agricultural meteorology and more.

## More details:

- The tour and the lecture take place in groups of up to 50 people under the guidance of the research team.
- There is also an option to add a visit to an advanced packing house. A total of 3 hours (including a tour of the farm and a lecture), suitable for groups of about 25 people.

It would be my pleasure to answer any questions you may have.

Best regards,

Dr. Pavel Trifonov, CEO Zemach Agriculture Technologies
